Pure Water Consultants has been using the Marketel System since 2004. As a result, we employ half the staff, yet our productivity has increased. The unit was fairly simple to install and is very easy to use. The Skiplist feature makes it very easy to screen against the Do Not Call List. Monitoring my employees is as simple as viewing the computer screen.

The support staff at Marketel Systems has also been very helpful. They have always taken the time to walk me through any technical questions that I've had.

I sincerely recommend using the Marketel System if you are looking for a way to increase productivity while reducing costs.

Sincerely,

Jodie Smith
Inside Sales Manager
